

ABSTRACT

Video information indicating a main video, sub-video information indicating a sub-video at least part of which can be
5 displayed superimposedly over the main video, predetermined part coordinate information specifying the coordinates of a predetermined part included in the sub-video in the coordinate system defined with respect to the sub-video, and sub-video control information are recorded on an information recording medium. The
10 sub-video control information includes (i) coordinates-before-movement information specifying the coordinates of a sub-frame before a movement wherein at least a part of the sub-video is the sub-frame and (ii) coordinates-after-movement information specifying the coordinates of the sub-frame after the
15 n-th movement (n is a natural number equal to or greater than 1).
